A personal experience

UNDAC Mission April / May 2015

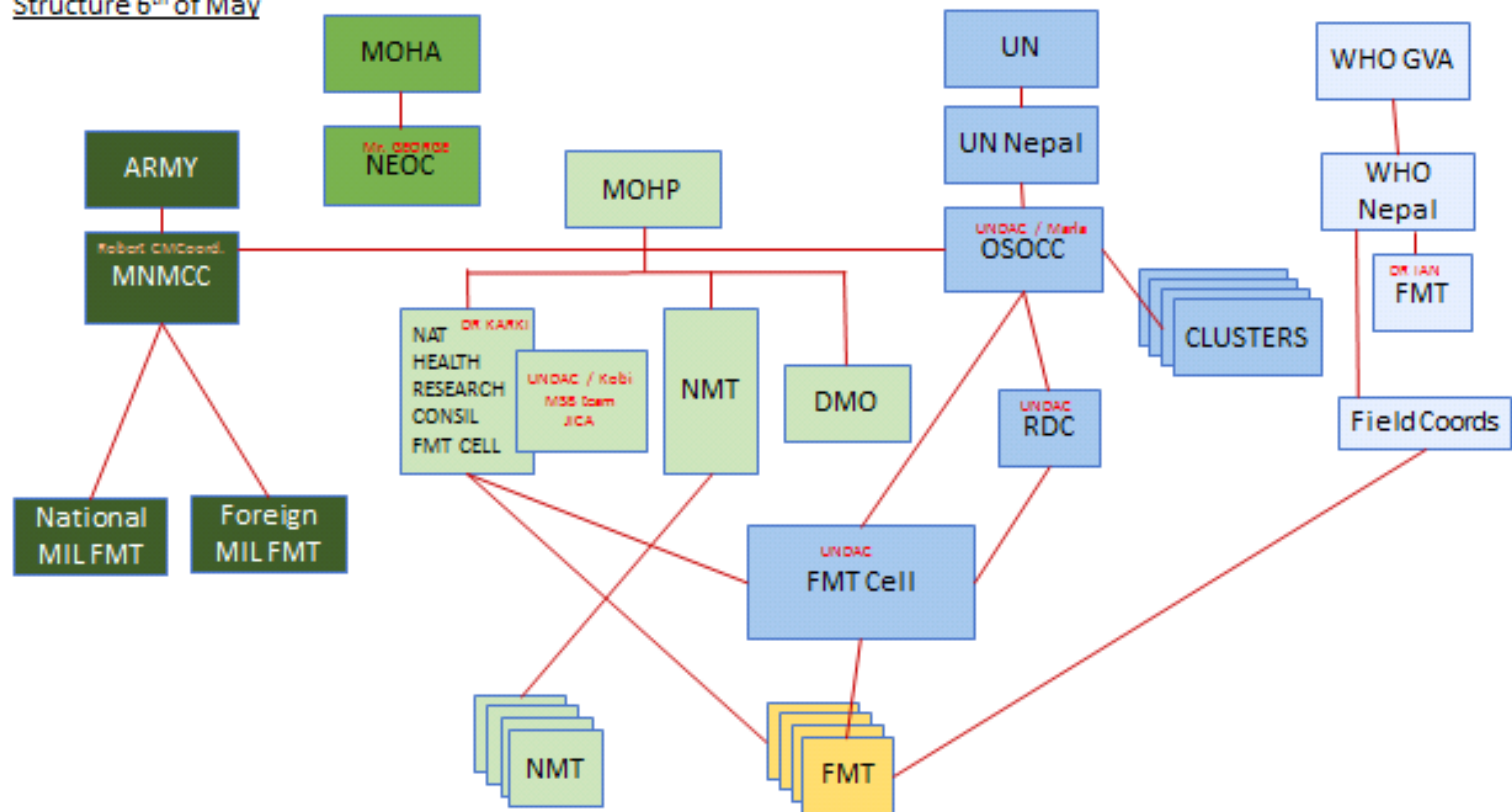

How to get there: Logistics

Trying to coordinate actors that do not want to be coordinated or do not know how the mechanisms works

Structure 6th of May

Kathmandu - Coordination

NEPAL EARTHQUAKE: Urban Search and Rescue (USAR) Team Snapshot (as of 07 May 2015)

KEY NUMBERS

31 countries **2,242** personnel
76 teams **135** K9 dogs
16 lives saved **1,182** medically treated

OVERVIEW

At the request of the Government of Nepal, urban search and rescue (USAR) teams are working around the clock to locate, extract and provide initial medical support to victims trapped by collapsed structures. USAR teams are faced with a complex rescue operation. Daily coordination meetings take place at the Multi National Military Coordination Centre at the Nepal Army Headquarters.

COUNTRY IN FOCUS

16 teams **720** total personnel **8** K9 dogs

India: 16 USAR teams with 45 personnel in each team.

INSARAG CLASSIFICATION

The INSARAG community acknowledges the importance of providing rapid professional USAR support during disasters which result in structural collapse. In an effort to achieve this objective and the need to ensure that only qualified and appropriate international USAR resources are deployed to an emergency, the INSARAG community has developed a voluntary, independent, peer review process, the INSARAG External Classification (IEC). To ensure that a USAR team's international response capability remains current and continues to subscribe to the INSARAG methodology, the INSARAG External Reclassification (IER) process has also been endorsed. Taken together these two processes form the INSARAG Classification System.

NEPAL: Earthquake Location Map

But : Where is the damage ?

Chautara – Sindhuplachok: more than 90% of houses destroyed

Trying to find ad-hoc solutions as neither government nor UN were prepared to respond

- Lack of „serious“ DRR and DRP
- „Resilience“
- Organizational culture hinders learning
- Int. Emergency response mechanism needs review

Lessons ?
